Fabric Swatch

Please attach a swatch
of the fabric
minimum size
50mm x 50mm

If the fabric has a two tone or shot effect
please indicate which thread/tone is required.

Standard shoe dyeing returned within 21 working days

£17.50 including postage and packaging

Express orders returned within 5 days from date of receipt

£23.50 including next day delivery

Colour matching notes

For the best match choose ivory or Cream satin as this will give the best results. White satin has a blue cast which affects the final colour. Dyed fabric will look different in natural and artificial light. Please state which you prefer.

If fabric is two tone or shot please state which tone or thread to match to.

Due to the textural differences in fabrics the item will never be an exact match as the sheen and texture change the tonal effect. I assure you the best match possible in both tone and colour will be achieved.

Dyeable shoes are not water resistant. The dyes used are water soluble so if your shoes are exposed to moisture the dye will bleed. I can protect your shoes with a water proof repellent. This will not make them completely waterproof but will prevent staining. If you opt for this treatment it will not be possible to re-dye.

I confirm that I have read the above information and accept that dyeing is undertaken at my own risk.
